Professional Summary

Software Engineer with 3 years of experience in Full Stack development and optimization of critical systems. Skilled in delivering efficient solutions, data traceability, and process improvement using Agile methodologies and DevOps practices.

Technical Skills

Languages: Java, Python, C++, C#, PHP, TypeScript, JavaScript, Dart

Databases: PostgreSQL, Sybase, MySQL, MongoDB, MariaDB, SQLite, Firebase

Web & Frontend Frameworks: Angular, React, Spring, Node.js, Vite

DevOps & Tools: Git, CI/CD, REST APIs, SonarQube, Bamboo, Docker, OpenShift

Practices & Methodologies: Microservices, Testing, Agile, Scrum

Professional Experience

Junior Analyst Developer – Banco Regional, S.A. | Sep 2022 – Aug 2025
San Nicolás de los Garza, NL, MX

- Optimized SPEI procedures and improved error handling, reducing I/O costs by nearly 80% and execution time by 20%.
- Developed secure Angular components for treasury modules, enhancing administrative management.
- Reduced processing time of historical data (~500,000 daily records) from 1 hour to 20 minutes.
- Implemented email and SMS alerts, improving alert accuracy and system efficiency for unexpected transactions.
- Enhanced core banking transaction monitoring and real-time error control.
- Developed integrated backend and frontend solutions for bank reconciliation, improving data communication and reducing errors.

Junior Developer – Coppel Digital | Jan 2022 – Sep 2022
Culiacán, SIN, MX

- Updated 30+ PHP and Node.js applications, eliminating vulnerabilities, optimizing dependencies, and improving system stability.
- Implemented PaperLess document digitization processes, reducing paper usage and streamlining document workflows.

Education

Bachelor's Degree in Computer Engineering | Jul 2017 – Jan 2022
Instituto Tecnológico de Los Mochis | Los Mochis, SIN, MX

Certifications & Recent Courses

- Azure Cloud (Sep – Oct 2025)
- C# Console + Web (Sep – Oct 2025)
- React.js with AI (Aug – Oct 2025)
